

# Year One's Winter Walk

10<sup>th</sup> January 2018

Today, Year One went for a walk in the local community. As part of our longitudinal study in Science we wanted to observe the changes in the trees around us and feel the temperature of the air whilst comparing it to autumn.

We also took the opportunity when going on our seasons walk to plan a recount write for later in the week. We discussed time words, learning that the events needed to go in a particular order.

We then spent a morning writing up our Winter Walk.
